This architectural cross-section, labeled 'Schnitt L1', illustrates the vertical structure of a multi-family house. The drawing shows the ground floor and upper levels, with detailed floor construction for various areas including terraces, living spaces, bedrooms, bathrooms, and a parking area. Key features include:

- Floor Construction Details:** Specific layers and materials are noted for different areas, such as 'Bodenaufbau Terrasse' (Terrace floor construction) with concrete, insulation, and drainage, and 'Bodenaufbau 2.OG' (2nd floor) with concrete slabs, insulation, and screed.
- Room Layouts:** The plan shows multiple living areas ('Wohnen'), bedrooms ('Zimmer'), a bathroom ('Bad/WC'), a technical room ('Technikraum'), and a parking area ('Abstellraum').
- Structural Elements:** The section shows the building's foundation, walls, and roof structure. It also indicates the location of stairs ('Treppenhaus') and elevators ('Aufzug').
- Dimensions and Levels:** Various dimensions are provided for room sizes and structural components. Elevation markers (e.g., +8.04, +9.00, +11.18) indicate the height of different levels relative to a common datum.
- External Features:** The drawing includes details for the building's exterior, such as the 'Geländer' (balustrade) on the terrace and the 'Grenze' (boundary) with the 'Strasse' (street).
